1 Database design with common sense business reasoning and learning   80%
Veda C. Storey , Roger H. L. Chiang , Debabrata Dey , Robert C. Goldstein , Shankar
Sudaresan
ACM Transactions on Database Systems (TODS) December 1997
Volume 22 Issue 4
> Automated database design systems embody knowledge about the database design
> process. However, their lack of knowledge about the domains for which databases are
> being developed significantly limits their usefulness. A methodology for acquiring and
> using general world knowledge about business for database design has been
> developed and implemented in a system called the Common Sense Business
> Reasoner, which acquires facts about application domains and organizes them into a a
> hierarchical, con ...

2 Acquiring knowledge about group facilitation: research propositions   80%
Fred Niederman
**Proceedings of the 1996 ACM SIGCPR/SIGMIS conference on Computer personnel
research** April 1996

3 CYC: a large-scale investment in knowledge infrastructure   80%
Douglas B. Lenat
Communications of the ACM November 1995
Volume 38 Issue 11
> Since 1984, a person-century of effort has gone into building CYC, a universal schema
> of roughly 105 general concepts spanning human reality. Most of the time has been
> spent codifying knowledge about these concepts; approximately 106 commonsense
> axioms have been handcrafted for and entered into CYC's knowledge base, and
> millions more have been inferred and cached by CYC. This article examines the
> fundamental assumptions of doing such a large-scale p ...

4 Analogical inference over a common sense database   77%

Thomas Lin
Eighteenth nati nal c nference n Artificial intelligence July 2002

5 Report on the 5th international workshop on knowledge representation   77%
meets databases (KRDB'98)
Alex Borgida , Vinay K. Chaudhri , Martin Staudt
ACM SIGMOD Record September 1998
Volume 27 Issue 3

6 JAFMAS: a multiagent application development system   77%
Deepika Chauhan , Albert D. Baker
Proceedings of the second international conference on Autonomous agents May
1998

7 Enabling agents to work together   77%
R. V. Guha , Douglas B. Lenat
Communications of the ACM July 1994
Volume 37 Issue 7

8 M: an architecture of integrated agents   77%
Doug Riecken
Communications of the ACM July 1994
Volume 37 Issue 7

Complete Search Help and Tips

The following characters have specialized meaning:

Special Characters	Description
, ( ) [	These characters end a text token.
= > < !	These characters end a text token because they signify the start of a field operator. (! is special: != ends a token.)
` @ \Q < { [!	These characters signify the start of a delimited token. These are terminated by the end character associated with the start character.
